

HEAT TRANSFER LABELS (FULL COLOR PROCESS PRINTING)

Heat Transfer Labels are normally printed in full color although spot colors can be used depending on the art and printing plate requirements. Minimum quantities required. Additional fees apply.

Layered Photoshop files are preferred. If using spot colors, make sure the Pantone color and location is specified clearly in the art file. Send only high resolution files (min 300 DPI). Low resolution files will result in a poor imprint. Resaving low resolution originals as high resolution does not improve the quality of the image. The original image must be at 300 dpi or higher.

INCLUDE ALL SUPPORT FILES.

Vector Files using blends, drop shadows and transparencies are acceptable for this print method.
