

Crew Cup Program Idea

The average employee drinks 3-4 beverages per shift - using a disposable cup, lid and straw. Save costs and support the environment by offering reusable Crew Cups.

Average Numbers

5
people per shift

X

4
drinks each

=

20
single-use disposable
cups saved per shift

Get your team involved in supporting your sustainability initiatives by providing them with reusable cup that they can customize with their name.

Only 2 shifts a day, 5 days a week equals 10,400 cups saved annually per location.

What would the cost savings & environmental impact be for your number of locations?
